ACKNOWLEDGEMENT

First of all, I would like to say Alhamdulillah, for giving me the strength and health to do this research until it done. I am heartily thankful to my supervisor, Associate Professor Tuan Haji Mohammad Nor Bin Othman, whose encouragement, guidance and support from the initial to the final level enabled me to develop an understanding of the subject.

I also wish to extend my thanks to my wife and parents for their continuous support, prayer and faith in to me. Lastly, I offer my regards and blessings to all of those who supported me in any respect during the completion of the project.

Abstract

Mechanism means by which an effect is produced or a purpose is accomplished. Preventive action is an action to eliminate the cause of a potential nonconformity or other undesirable potential situation. In the family members involvement in drug addicts is a group of persons who form a household under one head, including parents, children and relative which one of them are involved in drugs addict. The main objective of this study is to identify the mechanism on preventive action towards family members which involved in drug addiction at Taman Pelangi Ledang, Johor. The researcher also want to determine the family reaction towards the drug addiction measure and to identify the action on drug addiction in family institution. Besides that researcher want to analyze the relationship of the variables between the dependent variable and independent variable as well as to analyze the reaction and action towards family members which involved in drug addiction in family institution.
